

Japanese Utility Model Registration No. 3051963

Registration date: 24 June 1998

Application No.: 9-6288

Filing date: 16 June 1997

Owner: Mr. GOTO, Masaki, Tokyo

Claim:

A system of preparing point making-up cosmetics of original colors in agreement with her/his favor or fashion tendency, in which system point making-up cosmetic substances such as for lipstick, eyeshadow and rouge are kneaded, the substances thus kneaded are contained in a tubular receptacle or an elastic resinous receptacle whereby they can be cleanly used in a quantity needed for mixing, the color constituents of the total tone are mixed for use, and on this premise a color group of basic tone is separated from a group of color tone for modifying color phase, brightness or quality feel so that it is easy to prepare her/his favorite coloring.

#### EXAMPLE

The invention will be described more in detail, by way of Example, with reference to the accompanying drawings.

The reference numeral 1 designates a color group of basic tone contained in a tubular receptacle or an elastic resinous receptacle, 2 colors of basic tone, 3 a pallet or the like, 4 a lipstick brush or the like, 5 a group of adding colors contained in said receptacle, in which 5-a is blue, 5-b yellow, 5-c white, 5-d black, 5-e golden, 5-f silvery, 5-g pearl, 5-h gloss and 5-i mat respectively.

The color 2 of basic tone to be prepared is selected from among the color group 1 of basic tone, they are put in a suitable

quantity on a pallet, and an adding color is selected from the group of adding colors whereby they are mixed by the lipstick brush or the like to prepare a color of her/his interest.

For example, in the case of the color 2 of basic tone is red, a color of rose base color phase can be obtained by selecting for mixing from the adding color group 5 while a color of brown base color phase can be obtained by selecting the 5-b yellow therefrom. Further, by mixing the prepared rose base color with the 5-c white it is possible to obtain a pinc base color and by mixing the brown base color with the 5-d black it is possible to obtain a dark brown base color. Furthermore, by mixing them with the 5-e gold or the 5-f silver it is capable of obtaining metallic colors and by mixing them with the 5-g pearl a pearl color can be obtained. In addition, by mixing with the 5-h gloss or the 5-i mat or applying them onto the coated colors it is possible to obtain a quality sense of calendering or matting.
